

WE Tech Solutions is a Finnish clean-tech company that develops, sells and delivers energy efficiency solutions for the global shipping industry. The core of our solutions is based on permanent magnet generators and active front end drive technology. WE equip ships for success. For more info visit www.wetech.fi

As our business is expanding we are searching for a **Design Engineer** to join our team.

Your main responsibilities are:

- Create project documentation for customers
- Design of circuit diagrams and other electrical manufacturing drawings
- Dimensioning of electrical components
- Participate in technical discussions with suppliers
- Be part of the project team

Requirements:

- M.Sc. or B.Sc. in Automation or Electrical engineering
- Experience of Autocad Electrical or similar software
- Minimum 2 years of experience in similar tasks
- Knowledge of power systems and control systems
- Excellence in team working
- Ability to take responsibility and decisions independently
- Fluency in English, written and spoken
- Open mind and positive attitude
- Experience in marine solutions is seen as a merit.

WE offer you a competitive salary and good employee benefits. WE offer you the agility of a young company and possibilities to use and develop your skills in a wide area of expertise. WE offer an inspiring workplace with a seaside location in the heart of the city of Vaasa.
