

WE Tech Solutions is a Finnish clean-tech company that develops, sells and delivers energy efficiency solutions for the global shipping industry. The core of our solutions is based on permanent magnet generators and active front end drive technology. WE equip ships for success. For more info visit www.wetech.fi

As our business is expanding we are searching for an **Application Engineer** to join our team.

Your main responsibilities are:

- Application writing and execution
- Technical support within the organisation
- Technical troubleshooting on automation and power electronics
- Supporting commissioning of delivered solutions

Requirements:

- M.Sc. or B.Sc. in electrical or automation engineering
- Minimum 3 years of experience in similar tasks
- Knowledge in power electronics and PLC based control systems
- Willingness to travel globally
- Excellence in team working and communication in multicultural environments
- Ability to take responsibility and decisions independently
- Fluency in English, written and spoken
- Open mind and positive attitude

Experience in control systems for power generation and/or marine solutions are seen as a merit.

WE offer you a competitive salary and good employee benefits. WE offer you the agility of a young company and possibilities to use and develop your skills in a wide area of expertise. WE offer an inspiring workplace with a seaside location in the heart of the city of Vaasa.
