

*WE Tech Solutions is a Finnish clean-tech company that develops, sells and delivers energy efficiency solutions for the global shipping industry. The core of our solutions is based on applied variable frequency drive technology, variable speed power generation and DC-link power distribution for marine installations. WE equip ships for success. For more info visit [www.wetech.fi](http://www.wetech.fi)*

As our business is expanding, we are searching for a skilled **Design Engineer** to join our team.

**Main responsibilities:**

- Design of circuit diagrams and other electrical manufacturing drawings
- Dimensioning and selection of electrical components
- Coordinate and review electrical design of suppliers
- Create and maintain project documentation
- A member of the project team
- Participate in technical discussions with suppliers and other stakeholders
- Ensure the deliverables are ready on time in accordance with agreed schedules

**Requirements:**

- M.Sc. or B.Sc. in Electrical or Automation engineering
- Knowledge of power systems and control systems
- Experience of AutoCAD Electrical or similar software
- Minimum 2 years of experience in similar tasks
- Excellence in team working and communication in multicultural environments
- Ability to take responsibility and make decisions independently
- Fluency in English language, written and spoken
- Experience in power generation and/or marine solutions seen as a merit

WE Tech offer you a competitive salary and good employee benefits. WE offer you the agility of a young and international company with possibilities to use and develop your skills in a wide area of expertise. WE offer an inspiring workplace with a seaside location in the heart of the city of Vaasa.
