

WE Tech Solutions is a Finnish clean-tech company that develops, sells and delivers energy efficiency solutions for the global shipping industry. The core of our solutions is based on applied variable frequency drive technology, variable speed power generation and DC-link power distribution for marine installations. WE equip ships for success. For more info visit www.wetech.fi

As summer is approaching, we are searching for a summer trainee as design engineer to strengthen our Solution Engineering Department from April-May 2020 onwards.

Main responsibilities:

- Design of circuit diagrams and other electrical manufacturing drawings
- Create and maintain project documentation
- A member of the project team
- Ensure the deliverables are ready on time in accordance with agreed schedules.

Requirements:

- Last year student, B.Sc. in Electrical or Automation engineering
- Experience of AutoCAD Electrical or similar software
- Experience in similar tasks are an advantage
- Fluency in English language, written and spoken.

WE offer you the agility of a young and international company with possibilities to use and develop your skills in a wide area of expertise. WE offer an inspiring workplace with a seaside location in the heart of the city of Vaasa.
