As our business is expanding, we are searching for Skilled **Field Service Coordinators** to join our team.

The Service Coordinator has the responsibility to coordinate service engineers and materials for a defined case to a vessel or a shipyard. You will be working closely with Customers, Technical Service and Project Management depending on the case. A key part of the work will be handling of work orders, order updates, purchase orders, booking of service suppliers, collecting material for reporting and preparing material for invoicing of external customers.

Main responsibilities:

- Customer point of contact for defined service cases
- Planning, preparation and coordination of case activities
- Order & delivery of materials & resources for the case
- Case reporting to customer and internal stakeholders
- Coordinate and secure storage of case documentation and software
- Develop and maintain field service activities and documentation

Requirements:

- M.Sc. or B.Sc. in Electrical or Automation engineering or other relevant field
- Minimum three years of experience in similar tasks, more experience is seen as an advantage
- Multitasking, coordination skills and ability to take responsibility
- Excellence in team working and communication in multicultural environments
- Fluency in English language, written and spoken
- Knowledge of power electronics and PLC based control systems is seen as an advantage
- Experience in power generation and/or marine solutions is seen as a merit

WE Tech offers you a competitive salary and good employee benefits. WE offer you the agility of a young and international company with possibilities to use and develop your skills in a wide area of expertise. WE offer an inspiring workplace in the heart of the city of Vaasa, Finland.
