

*WE Tech Solutions is a Finnish clean-tech company that develops, sells and delivers energy efficiency solutions for the global shipping industry. The core of our solutions is based on applied variable frequency drive technology, variable speed power generation and DC-link power distribution for marine installations. WE equip ships for success. For more info visit [www.wetech.fi](http://www.wetech.fi)*

As summer is approaching, we are searching for an Application Engineer Trainee to join the team from May 2025 onwards.

### **Main responsibilities**

- Development work related to industrial control systems for our WE Drive solutions to measure and control electric power production, distribution and energy storage
- Documentation and development of solution functionality
- Technical support for internal stakeholders

### **Competence requirements**

- Eligible to work and live in Finland (Vaasa)
- Engineering student within either Electrical or Automation Technology
- Organisational skills with high attention to detail
- Good team working and communication skills
- Ability to take responsibility and make decisions independently
- Full proficiency in English, both written and spoken

Experience in power generation and/or marine solutions are seen as merits, as well as knowledge in power electronics and PLC based control systems.

WE Tech offers you a competitive salary and good employee benefits. WE offer you the agility of a young and international company with possibilities to use and develop your skills in a wide area of expertise. WE offer an inspiring workplace in the heart of the city of Vaasa.
