

WE Tech Solutions is a Finnish clean-tech company that develops, sells and delivers energy efficiency solutions for the global shipping industry. The core of our solutions is based on applied variable frequency drive technology, variable speed power generation and DC-link power distribution for marine installations. WE equip ships for success. For more info visit www.wetech.fi

As summer is approaching, we are searching for one summer trainee to join our Service team in handling tasks in Service Sales, Field Service and Technical Service from May 2025 onwards.

Main responsibilities:

- Support Service Sales in preparing quotations and related technical sales documentation
- Support Service Sales in identifying requirements in customer requests and respond on time
- Assist in the communication with customers and suppliers
- Be a part of the Service Team processing service orders for spare parts
- Assist in preparing and maintaining service documentation
- Support in planning, preparation and coordination of service case activities
- Assist in order and delivery of materials & resources for service cases
- Assist in coordinating and securing storage of case documentation and software
- Support Technical Service in handling of complaints and customer support
- Assist Technical Service in preparing technical documentation

Requirements:

- Minimum third year student, B.Sc. in Electrical or Automation engineering
- Good coordination and communication skills with ability to follow instructions
- Open minded, eager to learn and positive attitude
- Basic knowledge of electric power and control systems seen as an advantage
- Desire to learn and actively participate in Service activities
- Fluency in English language, written and spoken.

WE offer you the agility of a young and international company with possibilities to use and develop your skills in a wide area of expertise. WE offer an inspiring workplace with a seaside location in the heart of the city of Vaasa.
